

ANTI LIGATURE RANGE

Like all Winlock Specials the anti-ligature range is a high quality UK manufactured product exclusively available through Winlock.

We have 2 anti-ligature products available:

STEADFAST PROTECTOR 1

This is for use on espagnolette systems that are tongue driven and features a non-handed base with separate removable operating key. The tongue drive is available in various standard lengths but we can make any size to order.

STEADFAST PROTECTOR 2

This is for use on espagnolette systems with standard 7mm square spindle drives and 43mm screw centres. The base is non-handed and the separate removable operating key comes with a standard spindle length of 67mm but we can make any size spindle length to order.

Both products are available in white and silver as standard, but other colours are available upon request.

The Steadfast Protector range is another innovation from Winlock.
