

WINLOCK SECURITY ANNOUNCE INGENIOUS PARTNERSHIP

TELFORD, OCTOBER 2016. [Winlock Security](#), the UK's leading manufacturer of door and window hardware has expanded its range with the addition of **Ingenious Locks & Hardware MPL**.

Ingenious Locks and Hardware produce high quality and high performance door locks aimed at the discerning customer. Of note, they offer the 5 Hook Duplex lock (*see image left*) featuring two sets of opposing hooks locking into the same keep. As Winlock already has a similar feature on its market leading Stronghold patio lock (*see image below right*), it is now able to exclusively offer this unique feature across the full range of sliding and swinging doors.

The Ingenious lock range holds many accreditations including Secured By Design and has been tested in-house to over 500,000 operations, making it one of the most robust and secure products on the market. Key features include:

- Available in 35mm or 45mm backsets to suit PVC, timber and composites
- Adjustable adaptive compression rollers which engage before the locking points for smoother operation
- Unique Duplex 5 hook version
- Innovative 13mm axis one-piece keep which when paired with the Duplex or Professional (3 hook) lock comfortably exceeds PAS024 test requirements without the need for additional steel tops
- The Ingenious lock range has been included in Winlock's Document Q test programme; which enables fabricators and installers to use **Winlock's** test reports free of charge with immediate effect. Free Document Q certification is also available from Winlock on Kommerling, Liniar, Eurocell and Profile 22 Optima systems plus Nanya composite doors.

Alan Parker, Managing Director of Winlock Security said: " *We are always looking to provide our customers with unique and innovative solutions and we think the Ingenious range falls into this category with its double hook locking and clever striker designs that are a significant improvement on anything currently on the market. We think our customers and end users will love it.*"

Ingenious Managing Director Nigel Hutchinson commented *“We are delighted to be working in partnership with Winlock Security on our range of Multi-point locks. Winlock’s focus on the technical and development side of hardware, and approach to offering a fully-tested package of products to the market, fits well with our own values of product quality and performance. We look forward to a strong and positive alliance together.”*
