

## **The Stronghold Finger Pull**

Like all Winlock Specials this is a UK manufactured product, exclusive to Winlock, that is made to the highest quality standards and is available ex-stock.

The Stronghold is designed to provide high security with elegant good looks. It is made in the UK from solid brass and is available in a wide range of high quality finishes including natural brass, polished chrome, brushed chrome and black. By eliminating the need for a bulky backplate and lever the decorative options are only limited by your imagination.

It has been successfully tested to PAS024 on numerous occasions and is part of our Document Q range for Halo composite and pvc doors, and the Solidor composite door.

One of its unique features is that it is specially designed to fit a 35mm backset door lock on an over rebated door – there are many security finger pulls that will work on a 45mm backset but only the Stronghold will also fit a 35mm option.

It is available with cylinder protection on the external side, or without. The choice is yours.
