

**WINLOCK LAUNCHES FIRST 35MM BACKSET
STAINLESS STEEL FINGER PULL**

- **Made from solid brass or stainless steel giving a lifetime guarantee**
 - **Enhanced Security version available complies with TS007**
- **Slim design allows use with a 35mm and 45mm backset lock on over-rebated systems.**

The Stronghold Finger Pull is a combined escutcheon and pull that is designed to complement our range of Slam Shut and Key Operated door locks. In particular it was designed as a high security solution for “heritage” style applications including over-rebated doors requiring a 35mm backset lock. It complies with PAS024 when used in the security version with a 1 star cylinder and is part of our Document Q approved range of hardware (contact our sales department for the relevant test details and certificates). It will complement both modern and traditional door styles and is available in polished or brushed stainless steel finishes. A marine grade option is available for high corrosion environments.

Stronghold Finger Pull is readily available and reflects Winlock’s *innovative solution* ethos.
